

## CAPABILITY STATEMENT.

CAN.B GROUP PTY LTD

ABN: 86 680 071 292

[www.canb.com.au](http://www.canb.com.au)

### Who We Are

CAN.B Group is a sovereign Australian-owned systems integrator and prime orchestrator delivering mission-critical capability for government and regulated industries where assurance, resilience and accountability matter.

We design, integrate and deliver national-scale solutions through **AUSOVRN™**, Australia's sovereign capability delivery ecosystem, and its supporting **Ecosystem-as-a-Service (EaaS)** operating model. This model brings together trusted sovereign partners, assured technology platforms and cleared delivery teams under a single, accountable national coordination layer.

### What We Deliver

Through the **AUSOVRN™ Capability Stack<sup>1</sup>**, CAN.B Group is best placed to ensure supply chain integrity through the coordinated provision of:

1. **Sovereign, high-security data centre hosting** across metropolitan, regional and remote Australia.
2. **Enterprise** cloud infrastructure, virtual compute, storage and network orchestration.
3. Hyperscale and high-performance compute environments for **mission critical systems and workloads**.
4. **Mission-grade AI, analytics and modelling** aligned to government assurance requirements.
5. **Zero-trust cyber security architectures**, identity protection and defensive security uplift.
6. Classified and cross-domain enablement for **secure workload separation** and **high-assurance operations**.
7. **Cleared workforce deployment** for mission delivery, specialist programs and surge support.
8. **National coordination** of multi-vendor delivery, governance, **commercial alignment and assurance**.

---

<sup>1</sup> A proprietary, sovereign-first delivery framework comprising curated capability partners across multiple layers, deliverable as an integrated end-to-end service or modularly to meet specific mission requirements.

## How We Are Different

CAN.B Group operates as the accountable front door for sovereign capability delivery. We do not resell products, fragment responsibility or outsource accountability.

Our model is:

- **Sovereign-first:** Australian-owned and aligned to national interest outcomes.
- **Vendor-agnostic:** Partners are curated for capability, not logos.
- **Delivery-led:** Outcomes matter more than optics.
- **Assurance-driven:** Built to meet real regulatory, security and operational thresholds.

This approach enables government and critical industry clients to move faster, reduce risk and retain control without sacrificing capability or sovereignty.

## Who We Serve

We support:

- Australian Government and national security agencies.
- Critical infrastructure operators.
- Highly regulated industries where failure is not an option.

## Our Commitment to You

When you engage CAN.B Group, you are not buying advice, a product, or a logo. You are engaging a national delivery partner accountable for outcomes.

Our commitment is clear:

- **Clear accountability**  
We act as the single accountable front door for delivery. No finger-pointing. No fragmented responsibility.
- **Sovereign control**  
Your data, systems and decisions remain under Australian control, aligned to national interest and assurance requirements.
- **Delivery over theatre**  
We prioritise solutions that work in production, not concepts that look good on slides.
- **Vendor independence**  
Partners are selected for capability and fitness for purpose, not commercial incentives.

- **Assured outcomes**

Solutions are designed to meet real regulatory, security and operational thresholds, not minimum compliance optics.

- **Long-term stewardship**

We build capability that can be sustained, governed and evolved, not dependencies that create future risk.

We measure success by what is delivered, what is trusted, and what endures long after the engagement ends.

## Our Mandate

CAN.B Group exists to reset how sovereign capability is built and delivered in Australia.

We are here to restore accountability, reward real capability and coordinate trusted ecosystems that deliver in the national interest.

**AUSOVRN™: Australia's sovereign capability delivery ecosystem**

*Designed for the Mission. Built for the Nation.*
